

Stainless Steel Discus Padlock with protective cover

Yale, inspired by the past, is creating the future of security.

With 180 years of manufacturing expertise, we are introducing our padlocks with an exclusive Yale design and tested to EN12320:2012 standard for added security and reassurance, built with you in mind.

Designed for extreme outdoor usage

Suitable for boats, trailer ladders, shutter doors or any other high value item you want to secure outdoors in tougher weather conditions. Yale takes care of your possessions; you take care of the rest.

Extreme testing

Tested to EN12320:2012 to simulate forms of attack such as cutting, twisting and pulling of shackle and tested up to 240 hours for corrosion resistance to withstand extreme weather conditions for your peace of mind and a CEN rating of 3.

Enhanced security

With a hardened steel shackle to prevent cutting, key retaining and double locking for added security, you can be assured that your home or business is safe and secure. To ensure optimum performance it's important to lubricate the lock regularly.

Exclusive Yale design

With a smaller shackle clearance to protect from attack.
